FELLOW NUMISMATISTS:—

Once again it is our pleasure to welcome you to the Annual New York International Numismatic Convention, so ably presented and organized by our friends, Messrs. Margolis, Weber and Selfridge, and to invite you to participate in our Auction Sale, either by mail or in person in New York City.

The major part of this sale consists of the section of the Governor Charles Edison Collection which features Silver Dollars and Half Dollars of the 19th and 20th Centuries. Our previous sale included his American coins together with collateral material. Our next auction — a mail sale in the late winter or early spring — will offer much of the lesser material from the Edison Collection, as well as other groups not yet catalogued. There are some attractive Ancient Greek and Roman coins included.

You will note that we follow our usual pattern of listing coins alphabetically by country (using English spelling), except for listing the Scandinavian countries together, but we have started our second session with a small group of Orders and Decorations. We prefer to keep all of the issues of a country together in chronological order, without creating separate groups of different metals. It is easier for us, and we are sure that if we offer an item you need, you will find it in the catalog.

Our colleague, Alex G. Malloy, is presenting a sale of Ancient and Medieval Coins on Thursday evening, December 8th, at the convention hotel. For a catalog write to him at P. O. Box 38, South Salem, New York 10590.

We have recently acquired an attractive group of hammered silver coins — cobs — largely from Spain and a few from Spanish America — most of which are late Philip II or early Philip III. It will take a sustained effort over a long period of time in order to properly catalog each of these, but we have already discovered some rare pieces. We will present these as we prepare our future sale catalogs. Perhaps we can get them all before you within the next five years.

We also have in our vaults an interesting group of Cut and Countermarked Coins. Some are definitely for one or another of the Caribbean lands, others are simple merchants' overprints. These too will be offered in the near future.

We continue to want attractive coins of the world, paper money, commemoratives of the last century and before, and orders and decorations, as well as military service medals — either for direct purchase, or on consignment to auction. We invite correspondence. If a collection is of great size, we may be able to visit you to make final arrangements.

Your attention is called to the Numismatic Jewel that is described following the auction sale text.

We continue to prepare an up-dating of the Kardakoff catalog of Russian Paper Money. Following this auction catalog is a listing bringing us to the end of the Russian assignats.

ALL THE BEST

Weight is approximately One and a Half Pounds.
- Pistrucci spent over 30 years engraving these dies and was paid , for the time, the enormous sum of 3500 pounds for the work. When finished it was found that the intricate dies could not be hardened without risk of ruining them, so no medals were ever struck from these dies; only Lead impressions and electrotypes could be made.*

OMEGA

AN UNPUBLISHED MEXICAN 8 REALES OF PHILIP III

The photos above show an apparently unrecorded Ocho Reales of the Mexico City Mint struck in the name of Philip III circa 1598-1607. It is an 8 Reales assayer F of the undated series issued under both Philip II and Philip III. Stylistic evidence such as the single thick fesse in the arms of Austria and the apparent triple bendlets in the arms of the Low Countries (somewhat obscured by a broken die) coupled with the Lions Passant on the reverse all point to Philip III, even tho the first I of the king's ordinal is only barely visible.

What is remarkable about this coin is the manner in which the data is arranged around the obverse great shield. All other pieces noted show the mintmark to the left. This coin has 8 over F to the left of the shield and oM to the right. No other example which we have seen recorded has the data thus arranged. Pellicer does list a Four Reales with this set up, and Castan and Cayon list a Two Reales with this arrangement. Here is their big brother.

The reverse, in addition to the Passant Lions, is interesting in that ET and INDIARVM are divided by a small cross rather than annulets.

The weight is 27.25 grams, and the specific gravity is 10.32.

Imperial State Assignats

Nicholas I 1826-1843

Nicholas I maintained the same style of Assignats as were issued during the reign of his eldest brother Alexander I. It was also during the reign of Nicholas I that Russia experimented with platinum coinage. A separate coinage and paper money series was issued for Poland.

By 1840 the State Assignats had suffered considerable depreciation in commerce. Accordingly, it was resolved to replace them with other types of paper money and several experiments were carried out before the State Credit Notes first appeared in 1843. These ephemeral issues of the State Commercial Bank and State Loan Bank will be dealt with in the next installment.

Numbers in the left hand column below the dates are the Kardakoff page numbers followed by the lot numbers.
